Dadi's Firm, Gentle, Direct and Loving Guidance has Sustained my Spiritual Life

I was attracted to the path through Baba's loving drishti and His Ocean of Knowledge. But then the test papers began. Fortunately, I was able to share my challenges and consult with Dadi whenever they arose. In those days, Dadi's advice and replies would arrive through fax.

Once, in response to one of my mundane complaints, I received a one-line reply from Dadi. I thought the center coordinator only gave me a portion of the reply. So I requested the rest .

I was told right away, "That's it." I thought "Hmmmmmm...That's it?" Suspiciously, I asked again for the full reply but got no response. I decided to read it again and I finally got it.

My Dadi ever so lovingly gave me a timeless blessing. She wrote, "I still have faith you will transform."

To this day, Dadi's ageless words and vibrations sustain me."

Words of Wisdom

Transform from deep within so that your feet are not touching the ground and you are dancing with happiness in the awareness of who you are and who belongs to you...and give others this same experience. Wherever I go everyone is good and becoming better. Keep an elevated stage and have no burdens of service.

Dadi has been sharing how Baba gives us the power to discern and decide; He transforms us and enables us to know the difference between true and false,

right and wrong and the true meaning of non-violence. We get so intoxicated with love. It is love that makes us so light that we fly.

We have the intoxication that we are becoming kings of kings. The intellect is filled with faith; destiny is fixed. This study is so good. We enjoy studying, when there's total faith and no doubt that we will have victory. The fixed destiny is already created in the drama. Don't say, "This one shouldn't do that," or "Why is that one doing this?" etc. Remember: drama is fixed.

Drishti Point

I align myself with God's pure energy and vision and I see everyone and everything in its highest state. I see others not for who they appear to be but for the spiritual radiance that lies within.

Karma Yoga Exercise

I sit with Baba and the vision of myself fully transformed. I allow myself to step into that image . . . to feel it, to live from it and to be it.
