

Dadi Janki – 31 March – Shantivan

When your stage is like the Father's, service is fortune and remembrance is the kingdom

Baba is coming in two days and this is the last turn of the season – our stage should be so high and elevated. Through our thoughts we have to perform everything immediately.

How to accumulate our account of blessings and the account of charity? To accumulate in the account of blessings is a question of remaining content and making others content. Look at the Madhuban niwasis, they do a lot of seva and give a lot of love and happiness. Baba has made them instruments. They have to do a lot but there is always peace and patience. They have received the blessing from Baba of being tireless. They are multimillion times fortunate. The face of tiredness is such that no one will come in front of you. When you are tired, your face goes down and you get confused thinking that it is too much. You experience pressure and tension.

Some ask how to remain tension free? How to remain happy, peaceful and blissful? Baba has told us how we lost these and how to attain them again. Baba says – you had all these things and you lost them because you became body consciousness. Now if you remain in soul consciousness you will receive everything from the Father again. The Bestower of Happiness gives you happiness and so even the trace of sorrow will go. And as I perform actions – they should be such that I do not give sorrow to anyone. Neither should we give or receive sorrow.

Those who give sorrow are very strong hearted. Those who are true hearted can never give sorrow. Those who take sorrow are soft hearted. So our heart should not be too soft and the foundation should be strong in such a way that even if someone gives you sorrow there is the feeling that there is nothing in it. When you think there is something in it and you will think and talk about it, then it means that there is a karmic account. If it is seen that a person is taking sorrow – it means that the market of the ones who are giving sorrow continues. But Baba's shrimat is that neither should we give or take sorrow.

Have the aim to keep a good chart. A chart means what Baba likes. Baba asks us to keep attention on not giving or taking sorrow. If you do not give sorrow – those who give sorrow will take your test. If you have the account of blessings with you, then you will not experience sorrow. If your mind goes here and there during murli then it means that your chart is not good. Baba tells us straight - you fail.

Then there is the account of charitable actions. If you do service whilst keeping a good chart then you are very fortunate. If your stage is like the Father's then service is fortune and remembrance is the kingdom. You should be able to win the Father's heart – to get merged in His heart. First sit on His heart throne by making effort to become worthy all day long. Don't pay attention to waste things. Keep everything accurate, in your thoughts, words, actions and connections. This is only possible when you do as Baba teaches us - when there is no mixtures of your own mind's dictates - when the ego is finished. Don't show yourself saying - I can do this task, I can do this – but be peaceful and do whatever Baba is asking you to do.

So in 2 days, how to make your chart good? Baba has given us treasures, now He will take the account of the treasures we have received. What is your plan? The murli of yesterday was one that Baba spoke 15 years ago. We listen to it and we feel so good - we feel that we should to do all that Baba says. Today He said that until now very little service has been done. Now we should do so much service that those coming into the Silver Age are

Om shanti
